We are distributing the “State-of-the-Art” Commercial and Residential **GENANO PORTABLE AIR PURIFIERS** which **REMOVE** airborne particles to .001 microns including airborne mold spores, bacteria, and viruses **WITHOUT** a FILTER or UV in any size building. Genano products are good for **Green Buildings** and **LEED** since they are environmentally friendly and very energy efficient – no pressure drop on air handler units – and cause **NO natural resources to be used** since we **have NO FILTERS**. There are no costly polluted waste disposal problems for industry or healthcare.
