Austin Pure Air is distributing the “State-of-the-Art” Commercial and Residential **GENANO® Technology AIR PURIFIERS** which **REMOVE** airborne particles to **.001 microns – 1 nano** - including airborne mold spores, bacteria, and viruses **WITHOUT** a FILTER or UV in any size building. Genano products are very energy efficient – for **each \$1** of energy costs for our Genano Products – large or small – it costs **from \$43 to \$62** for different levels of filter efficiency systems which have much less efficiency.

Genano Units cause **NO natural resources to be used** since we **have NO FILTERS**. There are no costly polluted waste disposal problems for industry or healthcare.

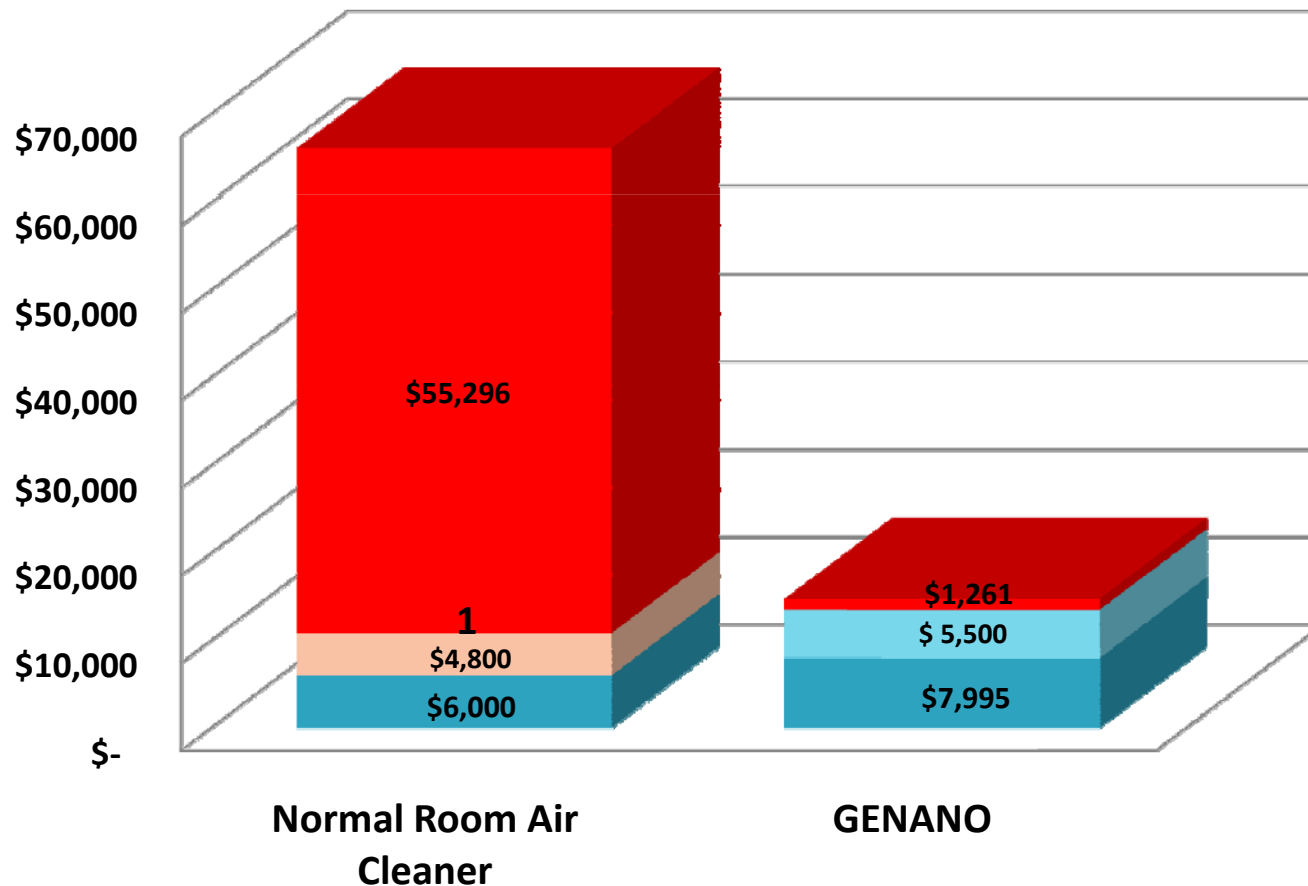

NEXT GENERATION AIR PURIFICATION TECHNOLOGY
